

**Team Arundo del Norte  
Steering Committee Meeting  
September 10, 2003**

**Minutes**

The sole purpose of this special meeting was to consider the CALFED directed action proposal rewrite for Phase 2 of the Arundo Eradication and Coordination Program.

Review of CALFED NIS workshop recommendations

Steering Committee Discussion

- How many replications of experimental trials are adequate in conducting program field experiments?
- What needs to be considered if multiple watersheds are involved in program?
- How can we successfully involve existing partners in experimental components? What additional funding may be needed to have a third party conducting these experiments?
